

Html.ActionLink Complete Example In ASP.Net MVC 5

In this chapter, you will learn:

1. What is **Html.ActionLink** helper method in ASP.NET MVC5?
2. Programming Example

Html.ActionLink is used for creating hyperlink. This action method renders hyperlink in html pages but it redirect to action method not directly to view pages.

PROGRAMMING EXAMPLE

```
1  @using HtmlHelperDemo.Models
2  @model UserModel
3
4  <h1>Html.ActionLink Example</h1>
5
6  <!-- Redirect in Same Controller -->
7  @Html.ActionLink("Contact Page","Contact")
8
9  <br />
10
11 <!-- Redirect in Another Controller -->
12 @Html.ActionLink("Report Page","Index","Report")
```

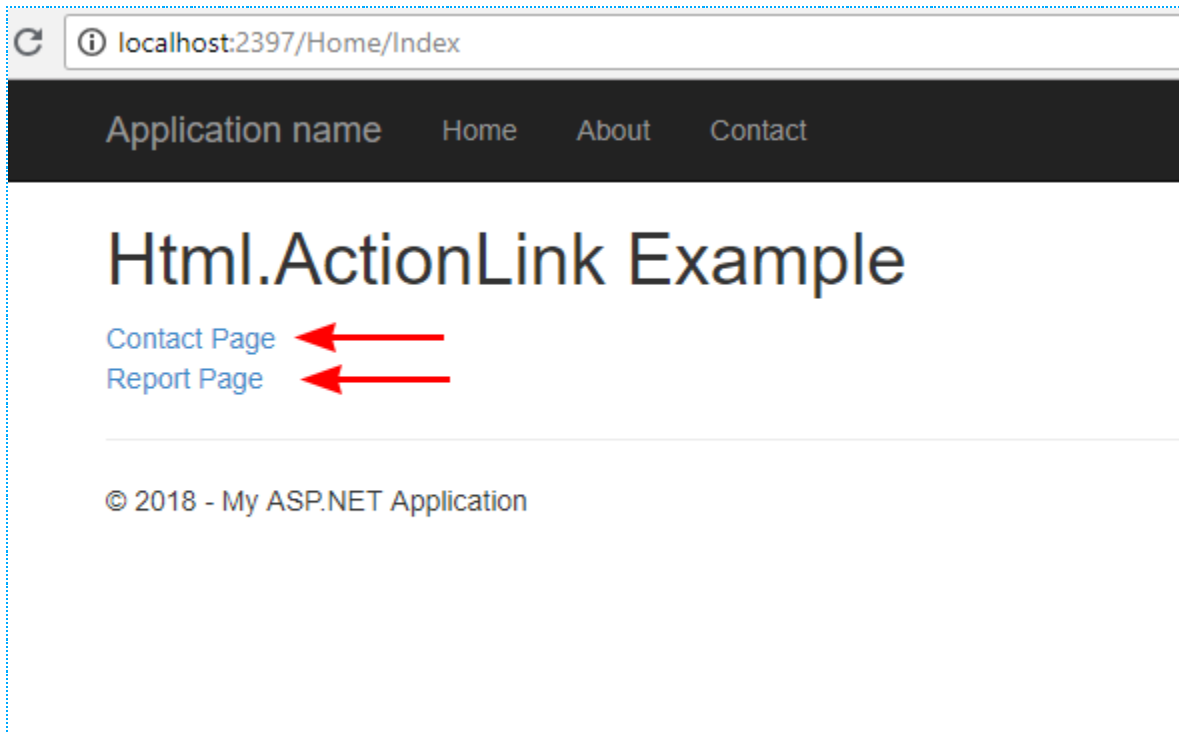

OUTPUT

Html Output

```
<!-- Redirect in Same Controller -->
<a href="/Home/Contact">Contact Page</a>

<br />

<!-- Redirect in Another Controller -->
<a href="/Report">Report Page</a>
```
